

ENGINEERING
APPRENTICESHIPS

**Engineering is behind
everything we use - from apps
to bicycles, solar panels to
lifesaving medical equipment.
Engineering is everywhere.**

**Engineers design, create,
invent and innovate.
They help shape the future
and make a difference in
the world we live in!**

**Engineer your future
with an apprenticeship.**

Welcome to MGTS

With a severe shortage of skilled, qualified engineers in the UK there has never been a better time to enter the world of engineering. Our Apprenticeships give you a clear pathway to a long lasting career, and we're here to support you at every stage. Here's what your MGTS journey looks like.

Apprenticeship Offer
Your journey begins

Start your Career
Earn while you learn!

-  The first year of the apprenticeship programme is spent completing 'off the job' training at our Technical Centre learning core practical, theoretical and behavioural skills.
-  In Year 2 apprentices return to the workplace to continue their learning whilst attending MGTS on a day release basis to complete the necessary educational requirements for the programme.
-  Years 3 and 4 see a continuation of learning in the workplace. Learners will focus on what is expected from the End Point Assessment, and undergo mock assessments in preparation for completing the actual assessment in the final months of their apprenticeship.

Employer Testimonial

"Our ongoing partnership with MGTS continues to play a vital role in the development of skilled engineering talent within our business.

Their expertise, professionalism, and commitment to high-quality training are closely aligned with our own values and standards. Through this collaboration, we have established a strong and sustainable pipeline of capable apprentices who contribute positively to our operations.

We look forward to continuing this successful relationship."

A little about us

MGTS is an educational charity that first began operating in 1966. We specialise in engineering apprenticeships, training and a skills analysis provision.

We work in partnership with a wide range of companies from SMEs to global operators, all within a diverse range of industries including manufacturing, automotive, aerospace, food & drink and logistics.

Our Apprenticeship Recruitment Team will provide information, advice and guidance on the engineering roles and opportunities best suited to your needs.

Our Technical Centre is equipped with modern industry standard equipment, providing you with a solid foundation for when you start work with your employer.

As an MGTS apprentice you will be appointed a dedicated Training & Development Adviser for the duration of your apprenticeship to support both you and your employer.

MGTS Trainers have all worked in industry and are fully qualified engineers, so you will be learning from the best.

Our Learner Support Team is on hand for pastoral care needs and offer a confidential service for any concerns you may have.

Our Technical Centre is well connected to transport links and offers free onsite parking.

MGTS has a long-standing and strong commitment to equal opportunities for all.

Who would make a good engineer?

Creative problem solvers great at finding solutions and thinking outside the box.

Improvers who want to make things work better.

Excellent team players who communicate well and enjoy sharing ideas and tasks.

Logical thinkers with an eye for detail and ability to think things through.

Difference makers who want to make the world a better place.

Connectors who can see patterns and make connections with the wider world.

Resilient characters who will bounce back and keep trying.

Why choose an apprenticeship?

-  Earn while you learn. You will be employed and earning a salary from day one of your apprenticeship.
 -  No loans necessary or fees incurred!
 -  The average starting salary for an engineering apprentice is between £15 - £17K, although many companies are offering higher salaries.
 -  Enjoy formal off-the-job training, a wide mix of learning in the workplace and the opportunity to practise new skills in a real work environment.
 -  Benefit from the support of a dedicated MGTS Training & Development Adviser throughout the whole of your apprenticeship.
 -  Achieve recognised qualifications such as:
 - Level 2 Diploma in Advanced Manufacturing Engineering
 - Level 3 Diploma in Advanced Manufacturing Engineering
 - BTEC Level 3 Diploma in Advanced Manufacturing Engineering
 -  Many of the companies that work in partnership with MGTS are committed to fully developing their apprentices and could potentially offer opportunities to study to a higher level (HNC, HND and Degree).
 -  Develop life-long transferable engineering skills (both practical and theoretical) in readiness for an exciting and rewarding career.
 -  Potential opportunity to join the MGTS 'Learner Voice' team to give feedback and suggest improvements to the apprenticeship journey for you and your peers.
- 
- An abstract graphic at the bottom of the page consisting of overlapping, semi-transparent geometric shapes in shades of yellow, orange, and grey, creating a sense of motion and depth.

Apprenticeship Pathways —

Mechatronics Maintenance Technician

Mechatronics Maintenance

Technicians ensure that plant and equipment perform to the required standard to facilitate production targets regarding Safety, Quality, Delivery and Cost within High Value Manufacturing environments. Typically the work would cover a broad range of activities including:

- Installation, commissioning and testing
- Fault diagnosis
- Ongoing planned maintenance of mechanical, pneumatic, electrical and process control equipment

Engineering Fitter

Engineering Fitters produce complex high value, low volume components or assemblies in full or part, using machines, equipment or systems, to the required specification. Fitters may typically have a mechanical, electrical, electronic, control systems, pipe fitting or instrumentation bias or operate across multiple disciplines depending on the type of assembly.

Toolmaker and Tool & Die Maintenance Technician

Toolmakers and Tool & Die Maintenance Technicians are involved in the highly skilled, complex and specialist detailed work of manufacturing and maintaining the engineering tooling used to produce components, products and assemblies. These affect all of our daily lives, whether it be for travel, energy, defence, food, clothing, packaging and health including medical equipment, devices and implants such as joint replacements. This requires the application of a broad range of activities including the interpretation of engineering drawings and technical instructions and the use of hand, machine and automated computer controlled machine tools and measuring equipment.

Machining Technician

Machining Technicians in the Advanced Manufacturing Engineering sector are predominantly involved in highly skilled, complex and precision work, machining components from specialist materials using conventional and/or CNC machine tools.

Engineering and Manufacturing Support Technician

Engineering and Manufacturing Support Technicians work as part of a team to provide technical support and expertise for all areas of the Engineering and Manufacturing function including:

- Communications software test/ Analysis tools/Measurement
- Offline programming
- Process control
- Performance & continuous improvement solutions
- Capacity planning
- Production scheduling/planning
- Product technical applications & capability
- Technical sales & marketing support
- Product development & innovation
- Engineering drawing
- Purchasing and/or supply of goods or services for engineering activities
- Quality control
- Inspection & e-commerce technologies as required

Apprenticeships

Product Design & Development Technician

Product Design & Development

Technicians primarily work on all stages of product creation and modification. They support activities ranging from early concept feasibility, design and development stages right through to final preparation for launch and customers. This may include:

- Working in a research and development environment
- Rapid prototyping
- Assembly and testing
- Validating and analysing performance
- Problem solving
- Material applications
- Manufacturing techniques

Not sure what's best for you?

Visit our website and answer a few simple questions to identify which apprenticeship pathway may be suitable for you.

Hey Girls!

Each year we see an increase in the number of female apprentice engineers train with us, but we would love for it to be much higher.

Our employer partners recognise and welcome the benefits of a diverse and inclusive workforce.

Visit wes.org.uk to read about inspirational women in engineering.

Introducing Lidia

Lidia is a multi-skilled maintenance apprentice with Ardagh Metal Packaging. She started a career in engineering in her mid twenties and shares details of her apprenticeship journey so far...

Whilst in a former role at Amazon, I frequently worked alongside engineers who maintained and repaired equipment. I was fascinated by the way they approached complex problems with such skill and precision. This experience inspired me to explore engineering as a career path.

After successfully completing my first year of training at MGTS, I've returned to company and am currently specialising in the electrical department. My responsibilities have included fault-finding during machine breakdowns, replacing motors, wiring sensors and assisting with the upgrade of electrical systems across the site. The experienced engineers I work alongside are always willing to explain complex tasks and help strengthen my understanding in areas where I need further development.

It's a challenge to both learn and contribute at the same time, especially during breakdowns but these situations have helped me grow faster and gain real, hands-on experience.

One of the main highlights of my apprenticeship so far has been the opportunity to apply what I've learned in real working situations. Being trusted to work alongside experienced engineers on live faults has helped me build confidence and feel like a valued part of the team.

We look forward to hearing about Lidia's future successes!

A selection of MGTS apprenticeship partners...

Employer Testimonial

"PepsiCo has been working with MGTS for over 15 years in a really collaborative partnership.

Our apprentices return from MGTS to go on to really successful careers within PepsiCo. We have had junior and mature colleagues following robust programmes, building fantastic logbooks and knowledge on 4-year tailored programmes that perfectly prepare them for engineering technical roles.

I would recommend MGTS to any business looking to switch or start their apprenticeship journey."

Apply Today!

We would love to hear from you if you have or are predicted to gain:
5 x GCSEs (or equivalent).

Grades must be A*-C / 9-5 for Maths and A*-C / 9-4 for English, a Science and two other subjects.

We also welcome applications if you have completed AS, A Levels or BTEC National in Engineering and are looking for a challenging and rewarding career.

Simply visit **www.mgts.co.uk** or **scan the QR code on the back page** to find out everything you need to know about an apprenticeship in Advanced Manufacturing Engineering and view our current vacancies.

Can't see the right vacancy for you? Simply complete a general application for either Coventry or Redditch. We'll then discuss suitable vacancies with you as they arrive with us. Only one application is required to be considered for multiple vacancy opportunities.

Follow us on social media to be the first to know about new opportunities:

Supporting you every step of the way

During your apprenticeship, our Learner Support Team will work closely with learners to offer pastoral care.

The team also offer support with specific learning difficulties and health issues.

Specialist support can be offered, as and when required.

This may include signposting a learner to qualified professionals. Alongside our dedicated Learner Support Team, our training staff have a wealth of experience in supporting our learners, from day to day workplace issues to more serious problems.

Our learners can feel confident that we provide an environment in which they should feel safe, secure, valued and respected.
